DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of . Group I, species (-)-menthol, and resin/vinyl chloride-vinyl acetate in the reply filed on 2/4/07 is acknowledged.

Claims 10,11 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/4/07.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-22 ARE rejected under 35 U.S.C. 112; second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what constitutes, straight or branched chains-chains of what?---P-----? For polymers, what is meant by "based." Polymers should be identified in the claims. Claim 6 is to covalently bound compounds; as such, they would not be effective as claimed, as no functional biocidal groups would be present.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1615

Claims 1-9,12-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamamori et al 4774080

Covalent bonding of reactive moieties (col. 3, lines 22-35) to provide resins of unsaturated acrylates (col. 4, lines 36-50) provide biocidal (col. 5, lines 10-13) films or coatings, inclusive of L-menthol (column 5, lines 57-62). Coatings are discussed at column 8, lines 20-60. See Example 31, the instant composition at 21/100 menthol to resin.

Claims 1-5,7-9,12-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyami 3507822

Vinyl resins coatings are known (col. 2, lines 20-53) with the instant Menthol (claim 9).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5,7-9,12-22 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Chastain et al 5294645

Ketones & hydroxyl compounds, as instantly claimed, are shown to be equivalently bactericidal (col. 1, lines 45-col. 2, line 44). Carrier permits of various coatings (col. 4, lines 24-

29) ; creams, ointments, paints, emulsions, soaps, gels, using polymers, vinyl acrylic resins (col. 9, 2. latex)..

Double Patenting

Claims 1,2,19-21 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 20 of copending Application No. 10/595143. Although the conflicting claims are not identical, they are not patentably distinct from each other because one in the art would know film formers include those of the instant polymers, and the instant active is the same as the '143 compositions .

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).
